

TECH TRACK

Life can be busy, and committing to a full degree program might not always be feasible. That's why Cleary offers our Tech Track certificates to accelerate your career without the extensive time commitment. Developed in collaboration with industry giants such as Google, IBM, and Meta, Cleary's curriculum ensures you gain the practical skills and expertise required to excel in these dynamic fields. And when the time comes to complete your bachelor's degree, the courses you have taken for your certificate also apply toward your degree - making your pathway even shorter to complete.

CERTIFICATES CURRENTLY OFFERED AS PART OF THE PUBLIC SAFETY PROGRAM

NEW

Google Project Management Professional Certificate

This certificate gives students the knowledge, expertise and leadership skills employers want and need. Courses emphasize key project management areas that focus on project planning, scheduling, monitoring, managing and evaluating.

IBM Cybersecurity Analyst Professional Certificate

The fast pace of technology is accelerating the threat of cybercrime and highlighting the need for professionals who can prevent it. This certification advances an understanding of cyber threats, data security and safeguards, and digital crime investigation.

CERTIFICATES COMING SOON AS PART OF THE PUBLIC SAFETY PROGRAM

Meta Social Media Marketing Professional Certificate*

Digital marketing is leading the charge in advertising, decision-making and consumer preferences. With this nationally recognized certificate, individuals will be ready to develop, executive and promote products and services for any industry because they are equipped with the in-depth knowledge of marketing principles, the power of persuasion, producing sustainable outcomes for businesses, and helping increase revenue for organizations.

Six Sigma Yellow Belt Exam Preparation*

Supply chain management has become an indispensable component of all businesses today. Through this preparation, students will learn all facets of supply chain management - from its use in a multicultural business environment to issues that surround global chain management, and future growth opportunities worldwide. Students will learn the application of supply chain theory to modern issues including the use of Six Sigma techniques. Upon successfully completing the course curriculum, each student will be prepared for taking their yellow belt exam.

Google Data Management and Analytics Professional Certificate*

Get started in the in-demand field of data analytics with a professional certificate from Google. Learn how to process and analyze data, use key analysis tools, apply programming, and create visualizations that contribute to key business decisions.
