

CLEARY UNIVERSITY

BACHELOR OF SCIENCE IN BUSINESS

CYBERSECURITY MANAGEMENT

Cybersecurity is essential to protecting organizational data, systems, and operations in today's digital world. The Cybersecurity Management major concentration prepares you to identify, assess, and manage cybersecurity risks within business environments. You will learn to evaluate security strategies, understand threats and vulnerabilities, and implement policies that safeguard organizational assets. Built on Cleary's Cleary Mind™ curriculum, the program combines business and technology courses to prepare well-rounded professionals. As organizations place greater emphasis on risk management, data protection, and regulatory compliance, demand continues to grow for graduates who can bridge cybersecurity and business operations.
